

## Lip Blushing Aftercare

Follow these instructions for 7-10 days, or until healed, for best results!

- Avoid eating temperature hot, spicy, salty or sour foods. (Use of spoons and straws are recommended.)
- Avoid wetting or touching your lips, kissing or similar actions as this can lead to infection.
- Avoid all cosmetic products, teeth whitening agents and smoking, etc. on unhealed lips.
- After every meal - gently rinse and clean lips with water and pat dry, then re-apply ointment.
- Gently apply a rice size amount of the aftercare ointment provided, 2-3 times per day or as needed until fully healed, using clean fingers. Don't allow your lips to get too dry.
- Apply a clean ice pack in 10-minute sessions to reduce any excess swelling if needed.
- Do not pick or peel any flaking of the skin, flaking is expected, as this is a part of the natural healing process. Picking or peeling can result in scarring, infection, pulling-out the pigment and may alter your best results.
- Avoid tanning beds and sun exposure until fully healed.

It was an honor working with you to give back the confidence you deserve!
